One of the leading experts in eye surgery, Kerry K. Assil, MD is continually contributing significant advances to his field with numerous introductions of state-of-the-art technology. Providing his patients with the finest possible vision in a caring, compassionate, and professional environment is Dr. Assil's passion.

The Assil Eye Institute regularly conducts FDA studies in which Dr. Assil develops and tests breakthrough technologies that advance vision correction surgery. Dr. Assil has personally trained more than 14,000 ophthalmologists from around the world in the latest in refractive and ocular surgical techniques. In addition to authoring more than one hundred textbooks, textbook chapters and articles on refractive and cataract surgery, Dr. Assil has served as editor and reviewer of multiple scientific journals. Dr. Assil is also called upon regularly to appear on network news, health and science programs as a pioneer in techniques in refractive, cataract and vision restoring surgery.

People from all walks of life, including eye surgeons, athletes, students, teachers, business professionals, and celebrities, travel from around the world to have Dr. Assil perform surgery on their eyes.

Dr. Assil counts a number of firsts among his achievements, including:

- First U.S. surgeon to use LensAR® laser for cataract surgery.
- First surgeon in California to use iFD Femtosecond Laser System
- Created the Elliptical Flap algorithm for e-LASIK
- Invented Reading Vision LASIK
- First surgeon in the world to utilize the Wavetec™ ORA System to correct astigmatism during cataract surgery

LEADERS IN SKIN CARE

DG
DERMATOLOGY GROUP
of Southern California, Inc.

Roy B. Blumenstrauch, MD
President and Medical Director
4201 Torrance blvd, Ste. 640
Torrance, CA 90503
www.dermatologysocal.com

Dermatology Group of Southern California, Inc., is a premier provider of highest quality general and cosmetic dermatological services. We have been taking care of Southern Californians for generations. Our highly skilled professional team is committed to providing excellent dermatology care so that you look and feel your best today and in the years to come.

We specialize in treating all types of skin problems, including skin cancers. Skin cancers account for more cancers than all other types combined and occur in cosmetically sensitive areas. We offer Mohs micrographic surgery, the most advanced procedure type, that is very precise in removing skin cancers with an accuracy that is unmatched. We also offer advanced solutions for age-related skin concerns such as wrinkles and sun damaged skin. Options include injectables (such as Botox, Juvederm and Sculptra), state of the art lasers and more, all geared to rejuvenate your skin and improve your appearance.
